

Brass Ball Valve for Fluid Control

This ball valve is made of high-quality brass and designed for industrial and general machinery applications. It features a smooth-operating ball mechanism for reliable shut-off and flow control in water, oil, and gas systems.

Product Overview

High-Performance Brass Ball Valve

This durable brass ball valve is engineered for precise fluid control in industrial and general machinery applications. Featuring a robust brass body and a smooth-operating ball mechanism, it ensures reliable shut-off and consistent flow regulation. Designed for versatility, this valve provides a secure, leak-free connection suitable for water, oil, and gas systems.

Technical Specifications

Compatible Media

- Water
- Oil
- Gas

Application Fields

Industrial Machinery • General Fluid Control
