

# Brass Ball Valve for Gas and LPG

This brass ball valve is UL approved for gas and LPG applications. It features threaded connections for secure installation in plumbing systems and a durable brass body for corrosion resistance.

## Product Overview

### Professional Grade Brass Ball Valve

This durable brass ball valve is engineered specifically for gas and LPG applications, ensuring reliable flow control in demanding plumbing environments. With a robust construction and UL approval, it provides professional buyers with the peace of mind required for safety-critical installations. The unit features a clearly marked yellow lever handle for quick 'ON' and 'OFF' identification and secure threaded connections.

## Technical Specifications

### Maximum Pressure Rating

**250 psig**  
Max Pressure

### Compatible Media

- Gas
- LPG

### Certifications

UL Approved

## Construction & Design

Body Material	Brass
Handle Style	Yellow Lever Handle
Connection Type	Threaded
