Product Overview

Professional HVAC&R Solutions

This brass ball-type pump valve is engineered for professional heating, ventilation, air conditioning, and refrigeration applications. Featuring a robust full port design, the valve minimizes pressure drop and ensures reliable shutoff across water, oil, and gas media. Its compact form factor is specifically designed to facilitate efficient installation in space-constrained industrial environments.

Technical Specifications

Available Models

Code	Specification
Y00114	22mm
Y00115	28mm

Design Type

Full Port

Material

Brass

Compatible Media

Water, Oil, Gas

Operational Features

Performance Key Features

- Reliable flow control
- Minimized pressure drop
- Compact installation design
- High-pressure and temperature resistance

Operation

Manual handwheel
