

Brass Ball Valve for HVAC&R

This brass ball valve is designed for HVAC&R applications. It features a compact body, threaded connections, and a lever handle for easy operation.

Overview

High-Performance HVAC&R Ball Valve

The JL-6249 series brass ball valve is specifically engineered for HVAC&R applications, providing reliable flow control for both liquids and gases. Featuring a compact body design and a durable lever handle, it ensures ease of operation in demanding environments. This valve is a versatile component for professional climate control and refrigeration systems.

Technical Specifications

Art No.	Size	
JL-6249	1/4	3/8
	1/2	3/4

Dimensional and sizing options for the JL-6249 brass ball valve series.

Size Reference Table

Art No.	Size (Inches)
JL-6249	1/4
JL-6249	3/8
JL-6249	1/2
JL-6249	3/4

Model Number	JL-6249
Available Sizes	1/4", 3/8", 1/2", 3/4"

Design & Construction

Body Material

Brass

Key Features

- Compact body design
- Lever handle for easy manual operation
- Suitable for liquid and gas flow control

Connection Type

Threaded

Application

Primary Application

HVAC&R (Heating, Ventilation, Air Conditioning, and Refrigeration)
