

Brass Ball Valve, Full Bore

This is a ball valve. It is full bore and constructed from brass.

Product Overview

Professional Grade Brass Ball Valve

This high-performance full bore brass ball valve is designed for reliable flow control in demanding industrial and commercial plumbing applications. Engineered to meet the PN40 pressure rating, it ensures durability and consistent operation under high-pressure conditions. The robust brass construction, paired with a sturdy brass handle, provides excellent corrosion resistance and longevity for critical fluid systems.
