

Brass Ball Valve Full Port

This brass ball valve is designed for reliable shutoff control in various fluid handling applications. It features a durable brass body, offering corrosion resistance and is equipped with a red lever handle for easy manual operation.

Product Overview

Industrial Brass Ball Valve

This high-quality brass ball valve is designed for reliable shutoff control in various fluid handling applications. Featuring a durable brass body, it offers excellent corrosion resistance and long-lasting performance in both industrial and commercial environments. The full-port design ensures maximum flow efficiency, while the integrated red lever handle provides easy, positive manual operation.
