

Brass Ball Valve with Butterfly Handle

This ball valve is constructed from brass and features threaded ends for connection. A red butterfly handle allows for easy on/off control of flow.

Product Overview

Professional Brass Ball Valve

This high-quality brass ball valve is engineered for reliable flow control in plumbing and industrial fluid systems. Featuring a compact butterfly handle design, it allows for easy, quick-turn operation in tight spaces. Built to withstand demanding environments, this valve is rated for PN25 pressure, ensuring durability and performance in liquid or gas applications.

Technical Specifications

Pressure Rating

25 PN

Pressure Rating

Material	Brass
Handle Style	Butterfly Handle
Connection Type	Threaded Ends

Applications

Common Applications	Plumbing Systems, Liquid Flow Control, Gas Flow Control, Industrial Piping
