

Brass Ball Valve with Butterfly Handle

This ball valve is designed for shut-off and control applications in various plumbing systems. It features a durable brass body, providing corrosion resistance and long-lasting performance.

Overview

High-Performance Brass Ball Valve

This durable brass ball valve is engineered for reliable shut-off and control applications in diverse plumbing systems. Featuring a robust brass body, it offers excellent corrosion resistance and long-term durability for both residential and commercial environments. The integrated green butterfly handle ensures easy manual operation and precise flow adjustment, while the threaded ends facilitate secure, leak-proof connections.

Technical Specifications

Material Construction	Brass
Handle Style	Butterfly Handle (Green)
Compatible Media	Water, Oil, Gas
Connection Type	Threaded

Key Features

Key Benefits

- Corrosion-resistant brass body
- Easy manual flow adjustment
- Leak-proof threaded connections
- Suitable for residential and commercial use
