

Brass Ball Valve with Butterfly Handle

This ball valve is designed for various applications in machinery and industrial settings. It features a durable construction with a brass body and a green butterfly handle for easy operation.

Product Overview

Professional Brass Ball Valve

This durable brass ball valve is engineered for reliable flow control in various industrial and machinery applications. Featuring a compact design with a convenient butterfly handle, it allows for quick and easy operation. The unit is built to handle fluid and gas control tasks efficiently, ensuring versatility in installation and long-term performance.

Technical Specifications

Model	Q11F-16T-ZZ
Aperture	8 mm
Thread Type	G

Design Features

Body Material	Brass
Handle Style	Butterfly Handle
Handle Color	Green
