

Brass Ball Valve with Drain

This two-piece brass ball valve includes a drain for maintenance. It is rated to 600 psi WOG and has female threaded connections.

Product Overview

High-Performance Brass Ball Valve with Drain

This durable two-piece brass ball valve is engineered for reliable on/off control of fluids and gases in plumbing and heating systems. Featuring a full port design for unrestricted flow and an integrated drain port, it allows for easy maintenance by draining the non-pressure side when closed. Built with a blowout-proof stem and PTFE seats, this valve ensures long-lasting safety and performance in demanding environments.
