

Brass Ball Valve with Green Lever

This ball valve is constructed from durable brass. It allows for quick shut-off and precise regulation of fluid flow with its green lever handle and threaded connections.

Product Overview

Professional Brass Ball Valve

This durable brass ball valve is engineered for reliable fluid flow control in industrial and plumbing systems. Featuring a distinctive green lever handle, it allows for quick, manual shut-off and precise flow regulation. Its robust construction and threaded connection design ensure a secure, leak-resistant installation for demanding applications.

Technical Specifications

Material	Brass
Handle Color	Green
Operation	Manual Lever
Connection Type	Threaded

Features

Suitable Applications

- Industrial fluid control
- Plumbing systems

Key Features

Quick Shut-off, Flow Regulation, Durable Construction
