

Brass Ball Valve with Lever Handle

This ball valve is constructed from durable brass. It features a lever handle for easy on/off control of liquids and gases.

Product Overview

Professional Brass Ball Valve

This durable brass ball valve is engineered for reliable flow control of liquids and gases in industrial and plumbing systems. Featuring a robust lever handle, it allows for quick and easy operation, ensuring efficient performance in demanding environments. The threaded ends provide a secure, leak-resistant connection suitable for various piping configurations.

Technical Specifications

Valve Type	Ball Valve
Body Material	Brass
Operation	Lever Handle
Connection	Threaded
Nominal Size	1/2 inch

Applications

Suitable Applications	Plumbing, Industrial Flow Control, Liquid Systems, Gas Systems
