Product Overview

Professional Brass Ball Valve

This high-quality brass ball valve is engineered for reliable flow control in plumbing and HVAC systems. Featuring durable brass construction, it offers excellent corrosion resistance and long-term performance. The quarter-turn rotational design allows for quick and easy on/off operation, making it an ideal solution for shutoff applications requiring frequent cycling.

Technical Specifications

Valve Type	Ball Valve
Connection Ends	Male Threaded
Operation	Quarter-turn lever handle
Material	Brass

Key Features

Key Advantages

- Durable brass construction
- Corrosion resistant
- Quick quarter-turn shutoff
- Reliable performance after many cycles
- Suitable for liquids and gases

Certifications & Standards	Green Manufacturing, Professional Grade
