

Brass Ball Valve with Red Lever

This ball valve is made of brass and features threaded connections for easy installation. It is suitable for controlling fluid flow in water, oil, and gas systems.

Product Overview

Professional Brass Ball Valve

This high-quality brass ball valve is engineered for reliable fluid flow control in both industrial and residential piping systems. Featuring a robust construction and a distinct red lever handle, it provides precise manual operation for water, oil, and gas applications. Its threaded design ensures straightforward installation, making it an essential component for secure shut-off and flow regulation.

Technical Specifications

Nominal Diameter	DN15
Material	Brass
Handle Type	Red Lever

Applications

Compatible Media	Water, Oil, Gas
------------------	-----------------

Features

Key Features

- Robust brass construction for durability
- Easy-to-use red lever handle
- Reliable shut-off capability
- Threaded connections for secure installation
