

# Brass Ball Valve with Red Lever Handle

This ball valve is designed for fluid control applications. It is made from durable brass and features a red lever handle for easy operation.

## Product Overview

### Professional Fluid Control

This high-quality brass ball valve is engineered for reliable fluid control across various plumbing, heating, and industrial applications. It features a robust brass construction ensuring durability and longevity in demanding environments. The distinct red lever handle allows for intuitive operation and provides immediate visual confirmation of the valve's open or closed status.

## Technical Specifications

Material	Brass
Connection Type	Female Threaded
Handle Style	Red Lever

## Applications

Suitable Applications	Plumbing, Heating Systems, Industrial Fluid Control
-----------------------	---

## Features

### Key Benefits

- Durable brass construction
- Easy-to-operate lever handle
- Clear visual open/closed status
- Leak-proof installation
