

Brass Ball Valve with Threaded Ends

This ball valve is constructed from brass and features a green handle. It is designed to control the flow of liquids or gases with threaded ends for secure connection to pipes.

Product Overview

Reliable Flow Control Solution

This brass ball valve is engineered for precise control of liquid and gas flow in both industrial and residential piping systems. Featuring a durable brass body and a distinctive green handle, it provides robust performance and long-lasting reliability. The threaded ends ensure a secure, leak-resistant connection, making it an essential component for various plumbing and fluid management applications.

Technical Specifications

Handle Color

Green

Construction Material

Brass

Connection Type

Threaded Ends

Applications

Primary Use Cases

- Industrial piping systems
- Residential plumbing
- Fluid management

Compatible Media

Liquids, Gases
