

Brass Ball Valve with Threaded Ends

This ball valve is constructed from durable brass material. It is designed with threaded ends to ensure secure and easy connection to pipes for controlling the flow of liquids or gases.

Product Overview

High-Performance Brass Ball Valve

This durable brass ball valve is engineered for reliable flow control of liquids and gases in industrial piping systems. Featuring robust threaded ends, it ensures a secure and easy connection for various plumbing applications. The inclusion of a high-visibility red handle allows for quick, intuitive operation and clear status indication.

Technical Details

Material	Brass (MS58)
Model Number	LL1003

Compliance & Standards

Certifications	ACS, CE, EAC
----------------	--------------

Features

Key Features

- Corrosion-resistant brass construction
- Threaded ends for secure installation
- High-visibility red handle
- Suitable for liquid and gas flow control
