

Brass Check Valve for Backflow Prevention

This brass check valve prevents backflow in fluid systems. It is constructed from durable brass material, ensuring corrosion resistance and providing a reliable seal.

Product Overview

Reliable Backflow Prevention

This brass check valve is engineered for efficient backflow prevention in fluid systems. Constructed from durable brass, it offers excellent corrosion resistance and ensures a reliable seal for long-term performance. Its compact design allows for straightforward installation and maintenance across plumbing, HVAC, and various industrial applications.

Technical Specifications

Key Features

- Corrosion resistant construction
- Compact design
- Automatic reverse flow prevention
- Easy maintenance

Material	Brass
Functionality	One-way flow control with automatic closure
Suitable Applications	Plumbing, HVAC, Industrial Processes
