

Brass Check Valve for Fluid Flow Control

This brass check valve controls fluid flow in one direction. It has threaded connections for easy installation in plumbing and industrial applications, and comes in multiple sizes.

Product Overview

High-Performance Brass Check Valve

This brass check valve is engineered for reliable, one-way fluid flow control in industrial and plumbing systems. Constructed from durable brass, it ensures longevity and resistance to corrosion in demanding environments. Designed for easy installation, the valve features threaded connections compatible with standard piping, making it a versatile solution for managing flow rates across various applications.

Technical Specifications

Key Features

- Corrosion-resistant brass construction
- Easy threaded installation
- Prevents backflow
- Suitable for various pipe diameters

Material	Brass
Function	One-way fluid flow control
Connection Type	Threaded
Available Sizes	Multiple sizes available
