

Brass Check Valve for Plumbing Systems

This brass check valve is designed to prevent backflow in plumbing systems. It features a durable brass construction for corrosion resistance and a spring-loaded poppet for reliable sealing.

Product Overview

Reliable Flow Control

This brass check valve is engineered to prevent backflow in essential plumbing systems, providing a robust solution for flow direction control. Constructed from durable brass, it offers excellent corrosion resistance and long-term reliability in demanding environments. The integrated spring-loaded poppet ensures a secure, tight seal, making it an ideal choice for protecting equipment from damage caused by reverse flow.

Technical Specifications

Primary Function

Backflow Prevention • Unidirectional Flow

Material	Brass
Mechanism	Spring-loaded poppet

Applications

Compatible Media	Water, Oil, Gas
