Product Overview

Professional Brass Compression Fittings

These durable brass compression fittings are engineered for reliable, leak-proof connections in plumbing, heating, and industrial fluid transfer systems. Designed for use with copper, brass, and plastic tubing, the compression mechanism eliminates the need for soldering or welding, ensuring quick and efficient installation. Each unit is precision-machined using digital lathes and rigorously checked with standard gauges to ensure consistent quality and dimensional accuracy.

Technical Details

Available Sizes

- 8mm
- 10mm
- 12mm
- 15mm
- 22mm
- 35mm
- 42mm
- 54mm

Product Code

SV-CF103

Material Composition

Brass, Copper (Olive)

Quality Assurance

Manufacturing Standards

Digital Lathe Machined • Standard Gauge Tested

Customization & Support

- Custom production based on drawings
- Custom production based on samples
- Free mould and tooling making
