

Brass Drain Valve with Barbed Hose Connection

This brass drain valve features a barbed hose connection for easy drainage. It is suitable for HVAC&R systems and other applications requiring controlled fluid drainage and includes a shut-off valve with a black handle and a tethered cap.

Product Overview

Reliable Fluid Drainage Solution

This brass drain valve is designed for controlled fluid drainage in HVAC&R systems and various industrial applications. It features a robust shut-off valve with a black handle for easy operation and a barbed hose connection for secure attachment. The integrated tethered cap ensures the outlet remains protected and prevents the loss of the cap during maintenance.

Technical Features

Material

Brass

Connection Type

Barbed Hose Connection

Control Mechanism

Shut-off valve with handle

Design Details

Safety Features

- Tethered cap to prevent loss
- Secure barbed connection

Handle Color

Black

Applications

Recommended Applications

HVAC&R Systems, Fluid Drainage, Industrial Plumbing
