

Brass Drain Valve

This brass drain valve is designed for efficient drainage and shutoff. It features threaded connections and multiple head designs, making it suitable for various industrial and engineering applications.

Overview

Industrial Brass Drain Valve

These professional-grade brass drain valves are designed for robust performance in industrial and engineering environments. Featuring a versatile architecture, they accommodate various head designs and threaded connection requirements. Their durable brass construction ensures reliability and longevity across diverse fluid management applications.

Technical Specifications

Body Material

Brass

Application Compatibility

- Industrial fluid systems
- Engineering applications
- Drainage management

Available Models

4002, 4002A, 4002B

Thread Size

1/4 inch
