

Brass Drop Ear Elbow with Female Threaded Inlet

This brass drop ear elbow features a female threaded inlet and push-fit outlet. It is designed for secure mounting to a surface, providing a stable connection for plumbing applications.

Overview

Reliable Brass Drop Ear Elbow

This brass drop ear elbow is engineered for professional plumbing applications requiring a secure, surface-mounted connection. It features a female threaded inlet and a convenient push-fit outlet, ensuring a stable and efficient installation process. The integrated 'ears' allow for firm mounting to studs or walls, providing a rigid point for fixture attachments.
