

Brass Elbow Fitting for Food Processing Machinery

This brass elbow fitting is designed for use in food, beverage, and cereal machinery. It provides a 90-degree connection for fluid or gas transfer within processing systems.

Product Overview

Industrial Brass Elbow Fitting

This high-quality brass elbow fitting is engineered specifically for food, beverage, and cereal processing machinery. It provides a robust 90-degree connection, essential for the reliable transfer of fluids or gases within complex industrial systems. Constructed from durable materials, this component is designed to withstand the rigors of demanding food processing environments, making it an ideal choice for machinery maintenance and system upgrades.

Technical Specifications

Material	Brass
Connection Angle	90 degrees
Part Number	J002
Suitable Applications	Food Processing, Beverage Machinery, Cereal Processing, Fluid Transfer, Gas Transfer

Performance Features

Key Performance Benefits

- Corrosion resistant material
- Reliable industrial performance
- Durable construction for demanding environments
- Optimized for machinery maintenance
