Product Overview

Reliable Gas Flow Control

This brass gas cock valve is engineered for secure and reliable gas flow management in HVAC&R systems. Featuring compression fittings on three sides and a convenient butterfly handle, it allows for precise on/off control and a tight, leak-resistant seal. Designed for durability and performance, this valve is an ideal solution for various gas line applications.

Technical Specifications

Specification Size	15 mm
Model Code	Y00111
Material	Brass
Connection Type	Compression Fittings
Handle Type	Butterfly Handle
Suitable Applications	HVAC&R Systems, Gas Line Control, Gas Shutoff
