Overview

High-Performance Brass Gas Valve

The JL-7821 series brass gas valve is engineered for precise flow control in HVAC&R systems. Constructed from high-quality brass, it offers exceptional corrosion resistance and durability for long-term industrial use. This valve is designed for compatibility with natural gas, propane, and other non-corrosive gases, featuring a secure threaded connection for leak-free installation.

Technical Performance

Maximum Operating Pressure

20 bar

Max Pressure

Operation Type

Manual lever handle for precise control

Standards & Compliance

CE, EN331

Size Specifications

Art No.	Size			
JL-7821	3/8	1/2	3/4	1
	1 1/4	1 1/2	2	

Comprehensive range of sizes available for various HVAC&R piping requirements.

Available Sizes

Art No.	Size (Inches)
JL-7821	3/8"
JL-7821	1/2"
JL-7821	3/4"
JL-7821	1"
JL-7821	1 1/4"
JL-7821	1 1/2"
JL-7821	2"

Material & Build

Body Material

Durable Brass

Connection Method

Threaded connections

Application

Compatible Media

- Natural Gas
- Propane
- Non-corrosive gases

System Suitability

HVAC&R Systems
