

Brass Gate Valve with Red Handwheel

This gate valve is constructed from durable brass and features a red handwheel for manual operation. It's designed for on/off control of fluid flow in various plumbing and industrial applications.

Product Overview

Durable Brass Gate Valve

This brass gate valve is engineered for reliable on/off control of fluid flow in plumbing and industrial systems. Featuring a robust brass body and a distinctive red handwheel, it is designed for manual operation and long-term durability. Its threaded connection design ensures a secure installation and reliable sealing performance, making it suitable for demanding environments.

Technical Specifications

Handwheel Color

Red

Key Features

- Corrosion resistant construction
- Secure threaded connections
- Reliable sealing
- Robust build for demanding environments

Material	Brass
Operation	Manual (Handwheel)
Connection Type	Threaded
Application Suitability	Plumbing, Industrial
