

Brass Head Hammer Non-Sparking

This hammer features a solid brass head for non-sparking applications. The handle is designed for a comfortable and secure grip.

Product Overview

Professional grade drum-type brass hammer featuring a non-sparking head and ergonomic handle.

Professional Non-Sparking Brass Hammer

This drum-type brass hammer is a specialized hand tool designed for environments where non-sparking and non-marring impacts are critical. Constructed from high-quality solid brass, the head provides a softer striking surface than steel to prevent damage to delicate components while eliminating the risk of ignition in flammable areas. The ergonomic handle features a high-visibility yellow finish and a textured black grip with a diamond pattern for superior control and safety during heavy-duty use.

Key Features

Core Features

- Non-sparking solid brass head for safety in hazardous environments
- Non-marring surface to protect workpieces from damage
- Precision casting processing for enhanced durability
- Ergonomic handle with slip-resistant diamond-pattern grip
- Integrated lanyard hole for secure tethering and storage

Technical Specifications

Precision cast brass heads available in multiple weight configurations, including the 2LB model shown.

Model Specifications

Model Number	Weight (lb)	Length (mm)
TK2103-02	0.5	250
TK2103-04	1.0	280
TK2103-06	1.5	310
TK2103-08	2.0	340
TK2103-10	2.5	370
TK2103-12	3.0	400

Head Material	Solid Brass
Manufacturing Process	Precision Casting

Safety & Compliance

Certifications	ISO 9001:2008, Non-Sparking Safety Tools Certified, Quality Management System Certified
Safety Standard	Copper Alloy Safety Tool Standards
Non-Sparking	Yes

Design Details

The textured diamond-pattern grip ensures maximum control and user comfort during operation.

Handle Features

Ergonomic Grip • High-Visibility Yellow • Lanyard Hole • Anti-Slip Texture
