

Brass Hose Connector with O-Ring

This brass hose connector is designed for secure and leak-proof connections in plumbing and irrigation systems. It features a hexagonal body for easy wrench tightening and threaded ends for compatibility with standard hose fittings.

Product Overview

High-Performance Brass Hose Connector

This durable brass hose connector is engineered to provide secure, leak-proof connections for both plumbing and irrigation systems. Featuring a robust hexagonal body for easy wrench tightening and threaded ends for universal compatibility, it ensures reliable performance in demanding environments. Constructed from high-quality brass, this connector offers excellent corrosion resistance and longevity, making it an ideal choice for garden hoses, water pumps, and industrial fluid transfer applications.

Technical Specifications

Design Features

- Hexagonal body for easy wrench tightening
- Threaded ends for standard compatibility
- Corrosion-resistant construction

Material	High-quality Brass
Sealing	O-Ring Included, Leak-proof Design

Applications

Suitable Applications

Garden Hoses • Water Pumps • Industrial Fluid Transfer • Plumbing Systems • Irrigation Systems
