

Brass Hose Fitting Connector

This brass fitting ensures secure connections in fluid and gas transfer systems. It is available in multiple sizes to accommodate various hose inner diameters.

Product Overview

Precision-Engineered Brass Hose Fitting

This brass hose fitting is designed for secure and reliable connections in various fluid and gas transfer applications. Constructed from high-quality brass, it offers excellent corrosion resistance and durability for automotive, industrial, and plumbing systems. Featuring a barbed end for optimal hose retention and a smooth bore for unrestricted flow, it is engineered for easy installation and long-lasting performance.

Manufacturing & Quality

Customization Services

- Accepts customer drawings
- Accepts customer samples
- Free mould and tooling making

Machining Method	Digital Lathe
Quality Assurance	Standard Gauge Checking, Dimension Verification, Thread Accuracy
