

Brass HVAC Water Filter with Pressure Gauge

This brass water filter is designed for HVAC&R systems and includes a pressure gauge for performance monitoring. It effectively removes impurities and sediment from water lines, ensuring optimal performance of HVAC&R equipment.

Product Overview

High-Performance Brass HVAC Water Filter

This durable brass water filter is engineered specifically for HVAC&R systems to ensure optimal fluid cleanliness. It features an integrated pressure gauge for real-time performance monitoring and a dedicated valve for efficient draining and flushing. Designed for longevity and corrosion resistance, this unit effectively removes impurities and sediment to protect your critical equipment.

Technical Specifications

Integrated Features

- Pressure Gauge for monitoring
- Drain/Flush Valve
- Corrosion-resistant construction

Material	Brass
Application	HVAC&R Systems, Water Filtration, Sediment Removal
