

Brass Industrial Plug for Pneumatic and Fluid Systems

This industrial plug is designed for robust and reliable connections in pneumatic and fluid transfer systems. It is constructed from high-quality brass, ensuring corrosion resistance and durability.

Product Overview

Precision Brass Industrial Plug

This precision-machined industrial plug is engineered for robust and reliable connections within pneumatic and fluid transfer systems. Constructed from high-quality brass, it offers excellent corrosion resistance and long-term durability for demanding environments. Its stepped barb design ensures secure hose retention and leak-proof sealing, providing optimal flow with minimal pressure drop.

Technical Specifications

Material	High-quality brass
Design Features	Stepped barb design, Leak-proof sealing, Corrosion resistant

Applications

Compatible Systems

- Compressed air systems
- Water transfer systems
- Hydraulic systems

Installation & Maintenance

Installation	Designed for convenient and easy installation
