

Brass Lamp Holder Socket

This is a high-quality brass lamp holder socket designed for secure and reliable electrical connections. The durable brass construction ensures long-lasting performance and resistance to corrosion.

Product Overview

Professional Grade Brass Lamp Holder

This high-quality brass lamp holder socket is engineered for secure and reliable electrical connections in various lighting applications. Featuring a durable brass construction, it offers excellent resistance to corrosion and long-lasting performance. The design includes a threaded exterior, ensuring easy installation and seamless compatibility with standard lamp bases for a safe and efficient lighting solution.

Technical Specifications

Material	Brass
Installation Method	Threaded exterior
Compatibility	Standard lamp bases

Key Features

Key Benefits

- Corrosion-resistant brass construction
- Durable design for long-term use
- Secure electrical connection
- Easy installation
