

Brass PEX Tee Fitting with Male Threaded Outlet

This brass PEX tee fitting features a male threaded outlet for connecting PEX tubing. It allows for branching PEX lines while providing a threaded connection point.

Product Overview

Versatile Brass PEX Tee Fitting

This brass PEX tee fitting with a male threaded outlet is engineered for reliable plumbing connections. It facilitates efficient branching of PEX tubing lines while offering a robust male threaded interface for seamless integration with other plumbing system components. Crafted from durable brass, this fitting ensures excellent corrosion resistance and long-lasting performance in various residential and commercial applications.
