

Brass Pipe Fitting with U-Profile Design

These brass pipe fittings are designed for HVAC&R applications within metal pipe systems. The fittings provide secure and leak-proof connections in plumbing and refrigeration setups.

Product Overview

Professional U-Profile Brass Fittings

These high-quality brass pipe fittings feature a specialized U-profile design, engineered for enhanced grip and simplified installation in demanding plumbing and HVAC&R systems. Constructed from premium-grade brass, these components provide exceptional durability, corrosion resistance, and secure leak-proof connections. With over two decades of production expertise, these fittings are manufactured to meet rigorous international standards for professional applications.

Technical Standards

Available Brass Alloys

- CW617N
- CW602N
- CW511L

Certifications

ISO 21003, AS 2537

Design Features

Recommended Applications

HVAC&R • Plumbing • Metal Pipe Systems

Profile Design

U-Profile
