

# Brass Pipe Nipple

This cylindrical brass pipe nipple features male threads on both ends for connecting plumbing fixtures. It is made of durable brass, offering corrosion resistance and secure connections for water, gas, and air lines.

## Product Overview

### High-Performance Brass Pipe Nipple

This cylindrical brass pipe nipple is engineered for reliable connectivity in plumbing and industrial piping systems. Featuring precision-machined male threads on both ends, it ensures a secure, leak-proof seal for water, gas, and air lines. Constructed from durable brass, this component offers excellent corrosion resistance and long-term durability for demanding applications.

## Technical Specifications

### Key Features

- Corrosion resistant
- Precision-machined threads
- Leak-proof design
- Durable construction

Material	Brass
Connection Type	Male Threaded
Compatible Media	Water, Gas, Air
