

# Brass Quick Connect Coupling for Hoses and Pipes

This brass coupling is designed for connecting hoses or pipes. It features a grooved design and a locking mechanism with levers for quick connection and disconnection.

## Overview

### Industrial Brass Quick Connect Coupling

This durable brass quick connect coupling is engineered for secure and efficient fluid transfer in demanding industrial environments. Featuring a robust grooved design and an integrated lever-locking mechanism, it ensures reliable, leak-proof connections for hoses and pipes. Its corrosion-resistant material makes it an ideal choice for irrigation, fluid management, and various heavy-duty industrial applications.

## Technical Specifications

Material	Brass
Connection Mechanism	Lever-operated quick connect
Design Features	Corrosion Resistant, Grooved Design, Leak-proof, Quick Release

## Applications

### Suitable Applications

- Fluid transfer systems
- Agricultural irrigation
- Industrial piping
- Hose connection assemblies
