Product Overview

Professional HVAC&R Brass Stop Valve

This brass stop valve is engineered for reliable flow control in heating and plumbing systems, backed by over 20 years of manufacturing expertise. Constructed from durable, corrosion-resistant brass, it ensures long-lasting performance and operational integrity. The design features a user-friendly red handle for precise manual regulation in demanding HVAC&R environments.

Technical Specifications

Model Dimensions

Code	Specification
Y00047	1/2" x 1/2"
Y00048	3/4" x 3/4"

Material	Brass
Connection Type	SxS (Threaded)

Features

Key Advantages	Corrosion Resistant, Manual Flow Control, HVAC&R Optimized, Green Manufacturing, High Durability
