

Brass Stop Valve with Handwheel

This brass stop valve is designed for controlling fluid flow in plumbing systems. It features a handwheel for manual operation and is suitable for water, oil, and gas lines.

Product Overview

High-Performance Brass Stop Valve

This brass stop valve is engineered for precise fluid flow control in professional plumbing, oil, and gas systems. Constructed with durable brass for superior corrosion resistance, it ensures long-lasting reliability and maintenance of system pressure. The integrated manual handwheel allows for accurate flow adjustments, providing a robust solution for controlling medium passage and preventing backflow.

Technical Specifications

Material	Brass
Operation Type	Manual Handwheel
Compatible Media	Water, Oil, Gas

Key Features

Benefits

- Corrosion-resistant brass construction
- Precise manual flow adjustment
- Reliable shut-off mechanism
- Backflow prevention
- System pressure maintenance
