

Brass Y-Pattern Check Valve

This check valve allows flow in a single direction while preventing backflow. It is made with robust brass for enhanced durability and resistance to corrosion.

Overview

Reliable Backflow Prevention

This Brass Y-Pattern Check Valve is engineered to ensure unidirectional flow and effectively prevent backflow in demanding industrial environments. Constructed from robust brass, it offers excellent durability and natural corrosion resistance for long-term service. The Y-pattern design, featuring a side inlet and inline outlet, is optimized for performance while facilitating straightforward installation and routine maintenance.

Key Features

Core Performance

35

Size/Rating Identifier

Technical Design

Valve Configuration

- Y-Pattern body style
- Side inlet configuration
- Inline outlet design
- Unidirectional flow control

Model Reference

2873-2

Material Specifications

Body Material

Brass • Corrosion Resistant

Application

Industrial Suitability

Backflow Prevention, Industrial Piping, Fluid Control
