Product Overview

Professional Granite Processing

This brazed diamond blade is engineered for the precise trimming, chamfering, and dimension processing of various granite slabs. Designed for high efficiency and stability, the blade ensures clean cuts and long-lasting performance in professional stone fabrication environments. Its specialized segment geometry helps reduce secondary wear and enhances cooling, making it a reliable tool for demanding construction applications.

Technical Specifications

Available Diameters

- 250
- 350

Cutting Type

Wet Cut • Silence • Non-Silence

Mounting Hole

60 mm

Design Features

Segment Design Options

Design	Primary Benefit
W-type	Reduced resistance & improved cooling
T-type	Increased wear resistance & base protection
Slant	Enhanced chip removal & reduced wear

Performance Highlights

Key Performance Advantages

Fast Cutting, High Efficiency, Stable Quality, Long Service Life
