

Brazed Diamond Continuous Rim Saw Blade

This diamond cutting blade is designed for cutting a variety of materials, offering high performance and durability. It features a continuous rim with brazed diamond segments and a steel core for stability.

Product Overview

High-Performance Cutting Solution

This brazed diamond continuous rim saw blade is engineered for professional industrial applications, including construction and renovation projects. Featuring a robust steel core for enhanced stability and vibration reduction, it delivers smooth and efficient cutting performance. The brazed diamond segment design ensures durability and versatility, making it suitable for both wet and dry cutting environments.

Technical Specifications

Blade Design

Continuous Rim • Brazed Segments

Cutting Method

Wet Cutting, Dry Cutting

Core Material

Steel

Performance Features

Key Benefits

- High durability brazed diamond segments
- Enhanced stability during operation
- Reduced vibration for smoother cuts
- Versatile application for construction and renovation
