

Brazed Diamond Grinding Wheel

This brazed diamond grinding wheel is suitable for both wet and dry grinding tasks. Its precision-balanced design ensures smooth operation and minimal vibration during use.

Product Overview

High-Performance Brazed Diamond Grinding Wheel

This brazed diamond grinding wheel is engineered for efficient material removal and extended service life on hard surfaces. Featuring a durable steel core with a high-quality brazed diamond abrasive layer, it ensures consistent performance for both wet and dry grinding applications. Precision-balanced to minimize vibration, this wheel is an ideal solution for professionals working with concrete, stone, and similar hard materials.

Technical Specifications

Key Features

- Brazed diamond abrasive layer
- Durable steel core
- Precision balanced for smooth operation
- Reduced vibration design
- Standard center bore for easy mounting

Compatible Materials

Concrete, Stone, Hard Materials

Usage Type

Wet Grinding, Dry Grinding
