

Brazed Diamond Saw Blade

This brazed diamond saw blade is designed for precise cutting of hard materials. It features a durable steel core with brazed diamond segments for extended life and aggressive cutting action.

Product Overview

Professional Brazed Diamond Saw Blade

This brazed diamond cutting blade is engineered for efficient and precise cutting of exceptionally hard materials. Featuring a durable steel core with high-performance brazed diamond segments, it offers extended tool life and aggressive cutting action. The blade is designed with integrated cooling holes to effectively manage heat buildup and prevent warping during operation, ensuring consistent performance for professional users.

Technical Specifications

Compatible Tools

- Angle Grinders
- Circular Saws

Operation Mode

Dry Cutting • Wet Cutting

Suitable Materials

Stone, Tile, Concrete, Masonry

Performance Features

Heat Management

Yes

Cut Quality

Clean, chip-free
