

Breaker Bar with Pivoting Head

This is a breaker bar designed to provide high torque for loosening or tightening fasteners. It features a long handle for increased leverage and a pivoting head for access in confined spaces.

Product Overview

High-Torque Performance

This breaker bar is engineered to provide maximum leverage for loosening or tightening stubborn fasteners. Featuring a durable metal construction with a corrosion-resistant finish, it is built to withstand the rigors of automotive repair and heavy-duty construction environments. The integrated pivoting head allows for precise access in confined spaces, making it a versatile addition to any professional toolkit.

Technical Specifications

Material & Finish	Steel with corrosion-resistant chrome finish
Head Mechanism	Pivoting head
Handle Design	Knurled/Textured for enhanced grip

Applications

Primary Use Cases	Automotive Repair, Construction, Heavy Machinery Maintenance
