Overview

Professional British Standard Electrical Solutions

This versatile wall socket and light switch combination is engineered to meet rigorous British Standards, ensuring reliable performance for both residential and commercial electrical installations. Designed for 220V-250V power systems, the unit supports a 13A electrical load, making it suitable for a wide range of standard appliances. With compliance to SASO regulations, these components offer a trusted solution for power transmission and distribution projects requiring high safety and quality benchmarks.

Electrical Specifications

Rated Current	13 A
Voltage Range	220V-250V

Design & Dimensions

Available Dimensions

- 86mm x 86mm
- 146mm

Compliance & Standards

Standards Compliance	British Standard, SASO
