

# Bronze Ball Valve for Fluid Control

This bronze ball valve is designed for controlling fluid flow in industrial settings. It features a durable bronze body and a lever handle for easy operation.

## Product Overview

### Industrial Bronze Ball Valve

This bronze ball valve is engineered for precise fluid control in demanding industrial environments. Constructed with a durable bronze body, it ensures long-term reliability and resistance to wear. The design features a convenient lever handle for easy operation and threaded connections that facilitate secure, leak-free installation across various fluid systems including water, oil, and gas.

## Technical Specifications

### Application

Industrial • Fluid Control

### Body Material

Bronze

### Compatible Fluids

Water, Oil, Gas

### Operation

Lever handle

### Connection Type

Threaded
