

Bronze Finish Decorative Lighting Fixture

This lighting fixture features a bronze finish for an antique look. It is designed to be a decorative element in indoor spaces.

Product Overview

Precision Engineered Lighting Components

These high-level customized parts are designed specifically for lighting fixtures, LED signage, and specialized industrial applications. Our comprehensive one-stop service model covers the entire production lifecycle, from initial concept, 2D/3D drafting, and prototyping to final surface processing and assembly. We utilize advanced metal stamping, CNC machining, and plastic injection molding to deliver components that meet rigorous dimensional and aesthetic requirements.

Manufacturing Capabilities

Technical Expertise

- Precision Die Tooling
- Custom 2D and 3D Drafting
- Complex Part Design
- High-Volume Stamping
- Small-Batch CNC Prototyping

Production Metrics

1996 Year Stamping Tech Established	2018 Year Deep Draw Tech Established
---	--

Core Services

Metal Stamping, Plastic Injection, CNC Machining, Deep Drawing, Prototyping, Surface Processing

Industrial Applications

Suitable Industries

Lighting Fixtures • LED Signs • GPS Applications • Home Appliances • Transportation • Medical Equipment
