Overview

Marine-Grade Bronze Globe Valve

This JIS-compliant bronze globe valve is specifically engineered for demanding marine applications, offering exceptional corrosion resistance and durability. Designed for precise flow control, it is suitable for regulating fluids and gases in shipbuilding and offshore environments. With a robust construction and a reliable Class 150 pressure rating, this valve ensures efficient performance in harsh maritime conditions.

Technical Specifications

Body Material	BC6 Bronze
Bonnet Material	C3771BD or BE
Disc Material	C3771BD or BE
Stem Material	C3771BD or BE
Handwheel Material	FC200

Performance Ratings

Pressure Class

Class 150

Suitable Applications

- Shipbuilding
- Marine Engineering
- Offshore Platforms
- Fluid Control Systems

Standards
